- ▶ Attempted to customize PDF exports and remove default resumé elements, to no avail

- ▶ Write in one format (Markdown), convert to many formats (PDF, HTML, ODT, DOCX, and more)
- ▶ Style HTML output with CSS and PDF output with a custom L^AT_EX header
- ▶ Use a simple pre-processor to define per-format operations on the Markdown input or its parts, such as moving contact information to the top right of the page in both HTML and PDF output.
